PROFESSIONAL ELECTRIC APPLIANCES

BLASTER

The revolutionary hair dryer, based on innovative and advanced technology. It presents an innovative, patent-protected, metal nozzle. The revolutionary hair dryer, based on innovative and advanced technology for drying, straightening and styling the hair while achieving maximum results. The use of the hair dryer reduces the physical effort by up to 40% and significantly reduces the time required by hair stylists by approximately 50% in comparison to other dryers available in the market. The significant advantage of the hair dryer is the metal strip installed in its wide nozzle. The metal strip allows for maximum heat absorption, so that the heat is transferred directly to the hair. The result - fast drying, maximum smoothing and straightening of the hair, a silky touch and exceptional shine.
